

Fundamentally more profitable, ideally positioned for recovery

December Quarter Results and Appendix 4C

27th January 2022 – Jayride Group Limited (ASX: JAY) (“Jayride” or the “Company”), the world leading global travel marketplace for airport transfers, is pleased to present its Quarterly Business Review and Appendix 4C for the quarter ended 31st December 2021 (Q2 FY22).

- Contribution profit¹ of \$168K in Q2 FY22; down 9% vs Q1 FY22, up 322% vs Q2 FY21,
- Net Revenue of \$396K in Q2 FY22; down 19% vs Q1 FY22, up 256% vs Q2 FY21,
- Trips Booked of 51,400 in Q2 FY22; down 21% vs Q1 FY22, up 238% vs Q2 FY21,
- Cash receipts from customers of \$380K; up \$112% vs Q1 FY22, up 133% vs Q2 FY21,
- Stand Still Operating Cash Flows (pre- growth) of \$(148)K, an improvement of \$400K vs Q1 FY22,
- Upcoming deployment of new offers into Booking.com and other travel brands,
- Positioned for growth as trip volumes grow across major markets.

Co-founder and Managing Director Rod Bishop, said: “We are pleased to present this quarterly report showing Jayride as a fundamentally improved and more profitable business compared to pre-pandemic. We are positioned to benefit as travel volumes continue to recover across the US, UK, Asian and Australian markets.

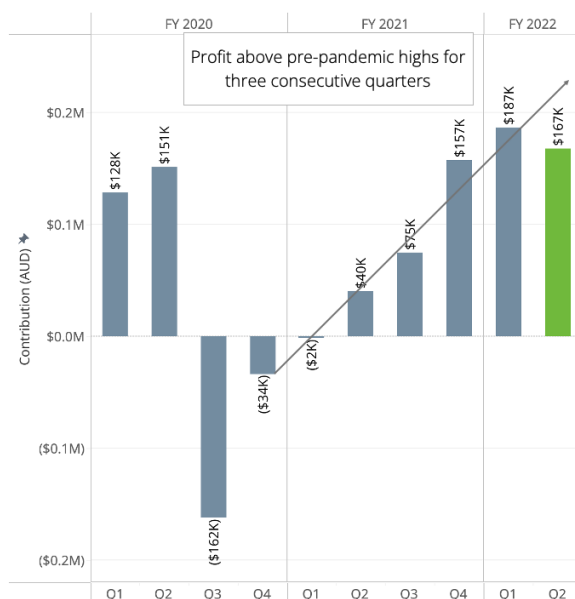

“We remain focused on executing our growth strategies to capture reopenings and increase market share, and are selectively deploying the proceeds from our capital raise. We have been successful in recruiting key talent across sales, marketing, product and technology, and these new team members will be transformative for us.

“In particular, we are increasing investment in our expanded traveller offer of new vehicles, service classes and more, including to deploy these into Booking.com and other channels, and also introducing further operating enhancements and automation for higher margins and a fundamentally improved traveller experience.”

Net Revenues

Contribution

¹ Contribution profit is net revenues less all variable costs, including marketing, transaction and customer support costs.

Trips modestly impacted in Q2

Passenger Trips Booked were 51K in Q2 FY22, down 21% vs prior quarter Q1 FY22 and up 238% vs Q2 FY21.

Trips were modestly impacted in Q2 with winter in the northern hemisphere, Europe lockdowns, and omicron-related border closures. Q2 FY22 was the Company's second-best quarter since the onset of the pandemic with trips up 238% versus the prior corresponding period of Q2 FY21. The Company continues to win share in Europe, as evidenced by trips which are above pre-pandemic all-time highs at 22K.

Passenger Trips Booked – Quarters

Contribution profit continues above pre-pandemic highs

Contribution profit was \$168K in Q2 FY22, down 9% vs prior quarter and up 322% vs Q2 FY21. This is the:

- Second highest ever quarterly contribution profit result,
- Second highest ever quarterly contribution margin at 42%, and
- Third consecutive quarter with contribution profit above pre-pandemic all-time highs.

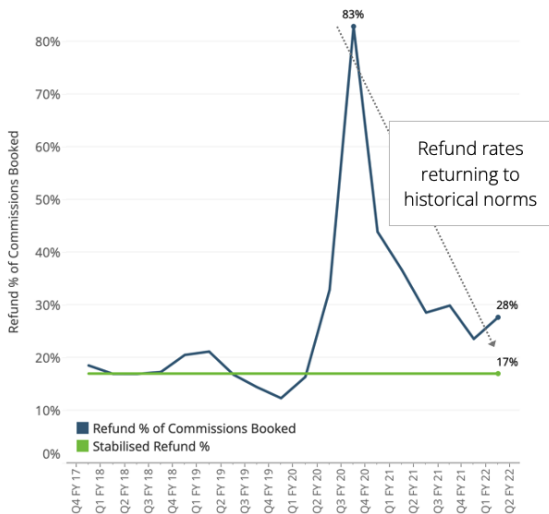

The improvement in contribution versus the prior corresponding period, up 322%, is a result of fundamental improvements in revenue per trip and operating leverage, despite elevated refund rates.

Date	Trips (#)	Net Revenue / Trip (\$)	Variable Cost / Trip (\$)	Contribution Margin (%)	Contribution (\$K)	Contribution Growth V PCP
Q2 FY21	15,200	\$7.31	\$4.69	36%	\$40K	
Q3 FY21	25,700	\$7.62	\$4.70	38%	\$75K	
Q4 FY21	46,900	\$7.43	\$4.08	45%	\$157K	
Q1 FY22	64,900	\$7.50	\$4.62	38%	\$187K	
Q2 FY22	51,400	\$7.71	\$4.44	42%	\$168K	322%

- New vehicles and service classes launched in December are beginning to increase net revenue per trip. In Q2 FY22 net revenue per trip increased to \$7.71,
- These improvements increased net revenue per trip despite increased refund rates, which positions net revenue per trip to increase further as refund rates return to historical norms,
- Investments to improve operating leverage kept variable costs per trip controlled at \$4.44, an improvement vs Q1 FY22 and the second lowest cost per trip in Company history,
- Contribution margin of 42% is positioned to increase further, and margin expansion is on track to the Company's 50% target as refund rates stabilise.

Refund Rates

Contribution Margins

Enhanced stand still operating cash flow

The Company achieved Stand Still Operating Cash Flows (pre- growth investments) of \$(148)k in Q2 FY22, an improvement of \$400k vs \$(548)k in Q1 FY22. The Company also began to selectively deploy the proceeds of the Company's capital raise with \$1.01m invested in future growth and scale.

Cash receipts from customers increased substantially to \$380K, up \$112% vs prior quarter Q1 FY22 and up 133% vs Q2 FY21. These improvements have come as a result of successful collections, and enhancements to operating processes that have led to reduced debtor days.

The Company typically runs a negative working capital model. In Q2 receipt movement from passenger trips booked was \$42K as the Company began to rebuild its cash float, positioned for more ahead.

Following the completion of balance sheet repair in the prior quarter, the Company incurred no further balance sheet repair costs, no further interest costs, and required no further financing.

Related parties were paid \$174K during the December quarter.

The Company's R&D tax incentive of \$330K was not received during Q2 FY22. It was lodged successfully during the quarter and the funds are now expected to be received during Q3 FY22.

On 31st December 2021, the Company held \$5.6M of cash and cash equivalents.

Positive outlook continues

Jayride is ideally placed to deliver growth and improved contribution profit as trip volumes rise in 2H FY22 and beyond, accelerating the Company's progress towards stand still EBITDA and stand still operating cash flow positive. Drivers of increased revenues and profits include -

Potential to Increase passenger trips, through:

- investments to deploy new vehicle classes and service types into new channels like booking.com to increase the Company's total addressable market, market share and reach,
- expansion in the Company's major markets in North America and Europe with summer in Jayride's largest markets driving higher seasonal travel.

Potential to increase contribution profits with operating leverage and scale, through:

- increased net revenues per trip with further investment in the Company's expanded traveller offer, including the Company's new vehicles and service types available across the full Q3; as refund rates reduce back to pre-pandemic levels through continued reopening; and as a result of continued improvements to the Company's operating model,
- decreased variable costs per trip through operating leverage and continued investment into systems and automation to drive improvements in our operating model.

Potential to compliment the Company's strong organic growth with disciplined acquisitions that are:

- consistent with Jayride's strategy to accelerate growth in scale in key markets,
- clearly able to add new channels that reach new travellers, and
- are on compelling financial terms.
